FINDINGS

● Passing

1. Statement of Identity

Rule Summary: The label must state what the product is on the principal display panel; where it is described as a dietary supplement, that carries Chapter 500 and Part 111 obligations.

Suggested Fix: The front panel states “KRATOM EXTRACT” as the statement of identity, and also labels the product “DIETARY SUPPLEMENT.”

Ref: 21CFR101.3/21CFR101.3(g)

2. Net Quantity of Contents

Rule Summary: Net quantity must appear on the principal display panel in the bottom 30 percent, in both unit systems where a weight is used.

Suggested Fix: The front panel shows “4x Chewable Tablets” and “250 MG PER TABLET | 1000 MG TOTAL” — a net quantity statement in both metric and US customary units (e.g., “1000 mg (0.035 oz)”) in the bottom 30% of the front panel should be added.

Ref: 21CFR101.7

3. Facts Panel

Rule Summary: The product must bear a Supplement Facts panel if marketed as a supplement, or a Nutrition Facts panel if marketed as a conventional food.

Suggested Fix: The Supplement Facts panel is present with serving size and servings per container. Remove the “Key Ingredients” header from the left column, leaving ingredient names unheaded, and keep “Amount Per Serving” as the sole header on the right column; move “Batch Number” and “Expiration Date” out of the Supplement Facts box and onto the panel below it, near the barcode.

Ref: 21CFR101.9/21CFR101.36

4. 7-OH Concentration Declaration in PPM

Rule Summary: The label must declare the 7-OH concentration in parts per million on a dry weight basis.

Evidence: The label lists 7-Hydroxymitragynine at 299 PPM, but prints “ON DRY WEIGHT BASES” instead of “basis,” and this appears under an “Amount Per Serving” column, not clearly tied to net contents.

Suggested Fix: Passing with recommendation. Spelling error override fix on next run. Also, passing with recommendation on the mg/g required by the new rule 5KE26-11 is currently not strictly enforced for the first 60 says – compliant until October 23, 2026. From there, this requirement can be added to the QR code. Restate the 7-Hydroxymitragynine concentration in mg/g (dry-weight basis) as required by 5KER26-11 (1) — per the COA (299.16 ppm dry-weight), that converts to approximately 0.299 mg/g. Do not use “Net contents” as the lead-in wording for this disclosure, since “net contents” already has a distinct meaning under the Net Quantity of Contents requirement (Critical Finding 2, above) and reusing it here risks conflating two different disclosures

Ref: 5KER26-1(1)/5KER26-1(2)(b)

5. Directions for Use

Rule Summary: The label should carry directions or a recommended use statement.

Suggested Fix: Add the heading “Directions:” before the usage instructions, e.g., “Directions: Take 1/4 tablet (62.5 mg). Do not exceed one serving every 48 hours.”

Ref: FED-Directions-Recommended

6. Addiction Disclaimer

Rule Summary: The label should disclose that kratom alkaloids may have habit-forming potential.

Suggested Fix: Add, in its own clearly separated paragraph: “WARNING: This product contains kratom alkaloids that may have habit-forming potential. Prolonged or high-dose use may lead to tolerance, dependence, addiction, withdrawal symptoms, or serious injury. Not intended for long-term or daily use. Use only as directed.”

Ref: FL-WarningStatements-AddictionDisclaimer-Recommended

7. Do Not Combine With Alcohol Warning

Rule Summary: The label should warn against combining the product with alcohol, medicine or other intoxicants.

Suggested Fix: Add a warning such as “Do not use this product with alcohol, medicine, or other intoxicating substances.”

Ref: FL-WarningStatements-DoNotCombineAlcohol-Recommended

8. FDA Disclaimer

Rule Summary: The label must carry the FDA disclaimer, prefixed 'FDA Disclaimer:', on its own line separate from other warnings.

Suggested Fix: Replace the current single-sentence FDA Disclaimer with: “FDA Disclaimer: These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.”

Ref: FL-WarningStatements-FDADisclaimer

9. Machinery Use Warning

Rule Summary: The label should warn against driving or operating machinery after use.

Evidence: The safety section only states “Do not use if ... operating heavy machinery” as a contraindication condition, but no statement warns against driving or operating machinery after consumption due to impairment.

Ref: FL-WarningStatements-MachineryUse-Recommended

10. Poison Control Statement

Rule Summary: The label should direct consumers to Poison Control at 1-800-222-1222 if an adverse reaction occurs.

Suggested Fix: Add “In case of adverse reactions, seek immediate medical attention or contact a Poison Control Center at 1-800-222-1222.”

Ref: FL-WarningStatements-PoisonControl-Recommended

11. Responsible Use and Misuse Disclaimer

Rule Summary: The label should carry a responsible-use or misuse disclaimer that limits liability to misuse rather than waiving it for all use.

Suggested Fix: The Legal Disclaimer states: “you assume full responsibility for any adverse events and/or health complications that may result from its use” — a blanket waiver not tied to misuse, which may be deemed unenforceable or replace the current Legal Disclaimer sentence with the short-form wording: “Notice: Use only as directed. The manufacturer and distributor are not responsible for effects resulting from misuse or use inconsistent with labeled instructions.”

Ref: FL-WarningStatements-ResponsibleUseMisuse-Recommended

12. Side Effects Warning

Rule Summary: The label should warn of possible side effects such as nausea, dizziness, drowsiness and withdrawal symptoms.

Suggested Fix: Add a side-effects warning, e.g. “Use of this product may cause nausea, dizziness, drowsiness or sedation, agitation, anxiety, hallucinations, breathing problems, rapid heart rate, seizures, and withdrawal symptoms.”

Ref: FL-WarningStatements-SideEffects-Recommended

13. Minimum Type Height and Contrast

Rule Summary: Required label text must be at least one-sixteenth of an inch high, no more than three times as high as wide, with sufficient contrast.

Evidence: No dieline or artwork specification was supplied stating type sizes, and type height cannot be measured from a flat image.

Ref: 21CFR101.2

14. Ingredient List

Rule Summary: Ingredients must be listed by common name in descending order of predominance by weight, with allergens declared.

Evidence: The "Other Ingredients" list names Microcrystalline Cellulose, Dicalcium Phosphate, Dextrose Monohydrate, Natural Flavoring, Silicone Dioxide, Sucralose, and Magnesium Stearate by common names.

Ref: 21CFR101.4

15. Name and Place of Business

Rule Summary: The label must conspicuously state the name and full street address of the manufacturer, packer or distributor.

Evidence: The label lists "Manufactured for: Moon Walker LLC, 8 The Green Ste B, Dover DE 19901," providing company name, full street address, and the required relationship term.

Ref: 21CFR101.5

16. Major Food Allergen Declaration

Rule Summary: Any major food allergen present must be declared by its common or usual name.

Evidence: The ingredient list shows no major allergen named or hidden allergen term; only Microcrystalline Cellulose, Dicalcium Phosphate, Dextrose Monohydrate, Natural Flavoring, Silicone Dioxide, Sucralose, and Magnesium Stearate are listed.

Ref: 21USC343(w)

17. Conspicuous Placement of 7-OH Concentration

Rule Summary: The 7-OH concentration must be clear and conspicuous and not placed solely on the bottom of the container.

Evidence: The 7-hydroxymitragynine concentration (302.39 PPM) appears on the back panel, not the bottom, and is set clearly against the solid green background without artwork overlay.

Ref: 5KER26-1(2)(c)

18. Pseudoindoxyl Isomer Declaration

Rule Summary: Where the lab report shows pseudoindoxyl present, its concentration must be declared on the label.

Evidence: The COA does not report pseudoindoxyl at all, so the declaration requirement is not triggered.

Ref: 5KER26-1(3)

19. Storage Instructions

Rule Summary: The label should carry a storage instruction such as store in a cool, dry place.

Evidence: The information panel states "Store in a cool, dry place away from direct sunlight," satisfying the storage instruction requirement.

Ref: FED-StorageInstructions-Recommended

20. Age 21 and Underage Use Warning

Rule Summary: The label should restrict purchase and use to persons 21 or older and tell consumers to keep the product away from children.

Evidence: The back panel states "For adults 21+ only. Keep out of children," satisfying both the age restriction and keep-out-of-reach elements.

Ref: FL-21PlusWarning-Recommended/FL-WarningStatements-UnderageUse-Recommended

21. PPM and MDL Statement Beneath Fact Panel

Rule Summary: Where 7-OH is non-detect or near the method detection limit, a supplemental PPM and MDL statement should appear beneath the fact panel.

Evidence: The 7-OH result is listed at 302.39 PPM, a value at or above the method detection limit, so the supplemental PPM/MDL disclosure is only recommended, not required.

Ref: FL-7OH-WordingBeneathFactPanel-Recommended

22. 7-OH 400 PPM Controlled Substance Threshold

Rule Summary: A kratom product may not contain 7-OH above 400 parts per million on a dry weight basis.

Evidence: The COA reports 7-Hydroxymitragynine at 302.39 ppm on a dry-weight basis, below the 400 PPM legacy threshold.

Ref: FL-893.03(1)(a)-7OH-400ppmThreshold

23. Batch Number

Rule Summary: The label should display a batch number identifying the production lot.

Evidence: The label displays a Batch Number "027101003" on the information panel.

Ref: FL-BatchNumber-Recommended

24. QR Code Linking to COA

Rule Summary: The label should carry a scannable QR code linking to a COA confirming 7-OH below 400 PPM.

Evidence: A scannable QR code is present on the back panel near the manufacturer contact information.

Ref: FL-COA-QRCode-Recommended

25. Company or Brand URL

Rule Summary: The label should display a URL for the company or brand.

Evidence: The back panel displays the email/web contact "contact@moonwalkerkratom.com" for the brand.

Ref: FL-CompanyURL-Recommended

26. Expiration Date

Rule Summary: The label should display an expiration date.

Evidence: The label displays an Expiration Date of "12/2028" on the supplement facts panel.

Ref: FL-ExpirationDate-Recommended

27. Consult Healthcare Professional Warning

Rule Summary: The label should tell consumers to consult a healthcare professional before use.

Evidence: The Safety & Legal Disclaimer states "Consult your healthcare provider before use," satisfying the requirement to direct consumers to consult a healthcare professional.

Ref: FL-WarningStatements-ConsultMedical-Recommended

28. Do Not Exceed Serving Warning

Rule Summary: The label should warn not to exceed the recommended serving and note that effects may be delayed.

Evidence: The Usage Guidelines state "Consume no more than one serving every 48 hours," which warns against exceeding the recommended serving.

Ref: FL-WarningStatements-DoNotExceedServing-Recommended

29. Warning Statement Presentation

Rule Summary: Warning statements should be legible, substantive, and not defer to a website for full disclaimers.

Evidence: The label states substantive warnings on-panel, including "For adults 21+ only. Keep out of reach of children" and other safety/legal disclaimers, without directing consumers to a website.

Ref: FL-WarningStatements-General-Recommended

30. Pregnancy and Nursing Warning

Rule Summary: The label should warn against use during pregnancy or nursing, or with medication or a medical condition.

Evidence: The Safety & Legal Disclaimer states "Do not use if pregnant, nursing, or operating heavy machinery," which conveys the required caution against use during pregnancy or nursing.

Ref: FL-WarningStatements-PregnancyNursing-Recommended

31. 7-OH 400 PPM Controlled Substance Threshold

Rule Summary: A kratom product may not contain 7-OH above 400 parts per million on a dry weight basis.

Evidence: The COA reports 7-Hydroxymitragynine on a dry-weight basis at 302.39 ppm, below the 400 ppm limit.

Ref: FL-893.03(1)(a)-7OH-400ppmThreshold

32. Alkaloid Ratio Not Disclosed

Rule Summary: Passing with recommendation as the new rule 5KER26-11 is currently not strictly enforced for the first 60 days - compliant until October 23, 2026. From there, this requirement can be added to the QR code. The rule requires every label, regardless of 7-oh level, to state the mitragynine-to-7-oh alkaloid ratio in mg, as a whole integer (e.g., "alkaloid ratio 120 mg:1 mg").

Suggested Fix: Neither the front nor back panel supplied contains an “alkaloid ratio” statement anywhere. The coa reports mitragynine at 107.81 mg/serving and 7-hydroxymitragynine at 0.17 mg/serving, which would compute to an approximate ratio of 634 mg : 1 mg (rounded up) — comfortably above the 100:1 minimum — but no such statement appears on the label as supplied. Suggested Fix: Add a standalone “alkaloid ratio [mitragynine mg]:[7-oh mg]” statement to the label, e.g., “alkaloid ratio 634 mg:1 mg” (subject to counsel/lab confirmation of the rounding convention).

Ref: 5KER26-1(1)(1)/5KER26-1(2)(b)

MOON

WALKER

SUPPLEMENT FACTS

Serving Size: ¼ Tablet 62.5 mg Servings per Container: 16	
Key Ingredients	Amount Per Serving
Mitragyna Speciosa	62.5 mg
Mitragynine	30 mg
Other Alkaloids	<1%
7-Hydroxymitragynine	302.39 parts per million (PPM) ON DRY WEIGHT BASES
Batch Number	027101003
Expiration Date	12/2028

Other Ingredients:

Microcrystalline Cellulose, Dicalcium Phosphate, Dextrose Monohydrate, Natural Flavoring, Silicone Dioxide, Sucralose, Magnesium Stearate.

Product Description: Tablets are made from premium Mitragyna Speciosa leaf extract, offering a refined and balanced formulation. Designed for adult use only, this product is not intended for daily consumption and should be used responsibly.

Usage Guidelines: Consume no more than one serving every 48 hours. Effects may be delayed by up to two hours. Store in a cool, dry place away from direct sunlight.

Safety & Legal Disclaimer: For adults 21+ only. Keep out of reach of children. Not a food product. Not intended to diagnose, treat, cure, or prevent any disease. Consult your healthcare provider before use, especially if you have medical conditions or are taking medication. Do not use if pregnant, nursing, or operating heavy machinery. Manufacturer and resellers assume no liability for misuse of this product.

FDA Disclaimer: These products and statements have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease.

Legal Disclaimer / Liability Disclaimer: By using this product, you assume full responsibility for any adverse events and/or health complications that may result from its use. Manufacturer/reseller assumes no liability for the misuse of this product.

*Total Minor Alkaloids is calculated as the sum of 7-Hydroxymitragynine and Mitraphylline.

MOS

Moisture Content - Loss on Drying

LAB-TM-008 - Loss on Drying
MOS-DTS-251212-016-01 - THU, DEC 18, 2025

Analyte	Value	Action Limit	LOD	LOQ	Status
Moisture	3.80 %	N/A	N/A	N/A	N/A

7OHFL

7-Hydroxymitragynine - Florida - Dry-Weight Basis

7-Hydroxymitragynine - (Florida — Dry-Weight Basis)
7OHFL-DTS-251212-016-01 - THU, DEC 18, 2025

Analyte	Value	Action Limit	LOD	LOQ	Status
7-Hydroxymitragynine - As Received*	290.90 ppm	N/A	N/A	N/A	N/A
7-Hydroxymitragynine - Dry-Weight*	302.39 ppm	400 ppm	N/A	N/A	PASS
Moisture (%) by Input*	3.80 %	N/A	N/A	N/A	N/A

*7-Hydroxymitragynine - As Received: The "As Received" value represents the concentration of 7-hydroxymitragynine, expressed in parts per million (ppm), as reported in the Kratom Alkaloids - Low Level test. This corresponds to the measured percentage of 7-hydroxymitragynine in the sample as received.

*7-Hydroxymitragynine (Dry-Weight Basis): The dry weight concentration of 7-hydroxymitragynine is calculated using the following formula: Dry Weight 7-Hydroxymitragynine (ppm) = 7-Hydroxymitragynine (ppm) x (100 / (100 - Moisture by Input (%)))

*The Moisture (%) by Input result may represent either a client-provided input or a value measured by Cambium. This value is incorporated into associated calculated analytes for reporting purposes.

Review critical findings before resubmitting packaging materials.
